PROFESSIONAL SUMMARY

Data Analyst with 1.5+ years of experience in SQL, Power BI, Python, MIS reporting, and CRM analytics. Experienced in building KPI dashboards, improving data accuracy, and transforming operational data into actionable business insights. Proven ability to support stakeholder decision-making through data quality management, reporting automation, and performance analysis. Currently pursuing an Executive PG Certification in Data Science & AI from iHub IIT Roorkee and seeking Data Analyst, Business Analyst, or BI Analyst roles.

TECHNICAL SKILLS

Programming & Databases: SQL (MS SQL Server, MySQL, Joins, Aggregations, Subqueries, Window Functions, CTEs), Python, Excel (Pivot Tables, XLOOKUP, Power Query, Data Validation, Lookup Functions)

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Looker Studio

Data Management: ETL Workflows, Data Validation, Data Governance, MIS & KPI Reporting

Analytics: EDA, Customer Segmentation, Root Cause Analysis, Statistical Analysis

EXPERIENCE

Regenesys Business School

Remote, India

Quality Analyst (CRM Analytics & Reporting)

Nov 2024 – Mar 2026

- Analyzed CRM and operational data using Looker Studio and Excel to develop MIS reports, track KPIs, and identify trends supporting data-driven decision-making across cross-functional teams.
- Built and maintained interactive dashboards and performance reports in Looker Studio, enabling stakeholders to monitor compliance metrics, operational performance, and reporting accuracy in real time.
- Improved CRM data accuracy by 25% through systematic data validation, quality audits, and root cause analysis of recurring data discrepancies, strengthening data integrity for downstream reporting.
- Gathered requirements from 2 cross-functional teams (Sales, Ops), translating business needs into reporting specifications while enforcing data governance standards to deliver accurate, business-ready analytical insights.

Edunet Foundation – EY GDS and AICTE Collaboration

Remote, India

Data Analyst Intern

Feb 2024 – Apr 2024

- Segmented 10,000+ customer records using Python (pandas, scikit-learn), PCA, and K-Means clustering to uncover behavior patterns and support targeted marketing strategy.
- Performed data cleaning, preprocessing, and feature engineering on raw customer data to improve dataset quality and downstream model accuracy.
- Delivered analytical reports and actionable business insights that contributed to a 15% increase in customer engagement and 12% improvement in campaign conversion rate.

PROJECTS

Banking Portfolio Performance & Loan Risk Insights | MS SQL, Python, Power BI | [GitHub](#)

Jun 2026

- Built an end-to-end banking analytics solution using Python (EDA), MS SQL Server, and Power BI to analyze a \$2.6B loan portfolio and \$1.75B in deposits; identified 482 high-risk customers, monitored a 148.4% loan-to-deposit ratio, and generated customer segmentation insights to support credit risk assessment and liquidity management.

End-to-End Sales Data Warehouse & Analytics | MS SQL Server, ETL, SSIS | [GitHub](#)

Mar 2026

- Designed and built a 3-layer (Bronze-Silver-Gold) SQL Server data warehouse using Medallion Architecture and Star Schema modeling, processing 116K+ records across 6 ERP/CRM tables into a star schema (2 dimension, 1 fact, 2 reporting tables); authored 10+ analytics queries using window functions and CTEs for customer segmentation, trend analysis, and YoY product performance comparisons.

EDUCATION

Executive Post Graduate Certification in Data Science and AI

Nov 2025 – Present

iHub IIT Roorkee

Online

Bachelor of Technology in Biotechnology

Aug 2019 – Mar 2023

Kamaraj College of Engineering and Technology

Madurai, Tamil Nadu

CERTIFICATIONS

Python | DataCamp

Jul 2025

SQL | HackerRank

Dec 2024

Microsoft Power BI for Desktop Intelligence | Udemy

Nov 2023
